09:15 (CEST) Registration & Welcome

09:30 – 17:30 Transferable Skills Training: 'Presentation skills' (Part 1)

Coffee breaks: 11:00 & 15.30

Lunch break: 13:00

*Trainers: Dr Gavin Lucas, Dr Lisa Saemisch
(ThePaperMill, Spain)*

Goal: In this training module we will introduce and explore key concepts and tools for designing and delivering scientific presentations and posters. We will explore aspects that are common to communication channels, including the profile and interests of potential audiences, and practical tools for clarifying the scientific message and pitching it at the right level for the audience. We will then work on strategies for developing structure and content, followed by input and exercises focused on practical aspects of talks and posters. Finally we will discuss, practice, and troubleshoot best practices for delivering presentations and posters.

Content

- Relating to my audience and telling a story
- Defining my message, content and structure
- Key concepts in visual communication
- Focus on creating posters
- Focus on creating slide presentations
- Presenting your work – concepts and practice
